

Pigment Gel®

Lighten all forms of hyperpigmentation and discoloration with this spot-treatment serum with hydroquinone that delivers brilliant results.

Key Benefits

- ✓ 2% hydroquinone for dramatic pigment reduction
- ✓ Skin lightening formulation promotes a bright, even complexion
- ✓ Effective for all types of hyperpigmentation including hormonal, sun-induced, and following inflammation or breakouts

Active Ingredient

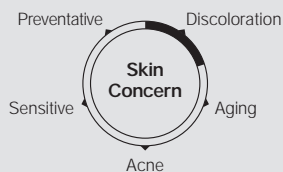

- + **Hydroquinone (2%)** – lightens existing and prevents future hyperpigmentation.

Key Ingredients

- + **Lactic Acid** – an alpha hydroxy acid (AHA) naturally found in milk and sugars. It is part of the skin's natural moisturizing factor (NMF) and moisturizes the skin.
- + **Phenylethyl Resorcinol** – an antioxidant derived from resorcinol that promotes an even skin tone.
- + **Azelaic Acid** – helps promote a clear complexion and even skin tone.
- + **Kojic Acid** – helps promote an even skin tone.
- + **Glutathione and Silybin** – are potent antioxidants.

Skin Type

- Dry
- Oily
- Combination
- Normal
- Sensitive

Directions for use *☾

After cleansing and toning, spot-treat affected areas and allow to penetrate. Follow with the appropriate **PCA SKIN®** broad spectrum SPF product in the daytime and moisturizer in the evening.

Retail: 1 fl oz | Trial: 0.25 fl oz

Before

After four months

Condition: Post-inflammatory hyperpigmentation. **Solution:** Facial Wash, Pigment Gel®, Protecting Hydrator SPF 25, ReBalance. *Photos not retouched.

Pro Tips

Using the only FDA-approved ingredient for hyperpigmentation and melasma, **Pigment Gel®** can be used to lighten all forms of unwanted pigment.

Some people can be sensitive to hydroquinone. Patch test a small part of the skin, by the ear, to test for any sensitivity to hydroquinone before using the product on the face. Wait 24 hours to ensure there's no reaction.

Hydroquinone can be paired with all other corrective products without a negative interaction, including retinol, salicylic acid, and benzoyl peroxide.
